Tire Science and Technology
Index to Volume 12
1984

C

Chakko, M. K.: Analysis and computation of energy loss in radial tires, 3

D

Damping coefficient
Formation of standing waves in radial tires (Kwon and Prevorsek), 44

E

Energy loss
Analysis and computation of energy loss in radial tires (Chakko), 3

F

Footprint forces
An experimental—analytical method to determine interaction forces on tire rims (Koeller), 23

H

Heat generation
Formation of standing waves in radial tires (Kwon and Prevorsek), 44

K

Koeller, R. C.: An experimental—analytical method to determine interaction forces on tire rims, 23

Kwon, Y. D. and Prevorsek, D. C.: Formation of standing waves in radial tires, 44

L

Load cell
An experimental—analytical method to determine interaction forces on tire rims (Koeller), 23

M

Material properties
Formation of standing waves in radial tires (Kwon and Prevorsek), 44

Modeling of tires
Analysis and computation of energy loss in radial tires (Chakko), 3

P

Power loss
Formation of standing waves in radial tires (Kwon and Prevorsek), 44

Prevorsek, D. C.: **see** Kwon, Y. D. and Prevorsek, D.C.

R

Rolling resistance
Analysis and computation of energy loss in radial tires (Chakko), 3

Formation of standing waves in radial tires (Kwon and Prevorsek), 44

S

Speed
Formation of standing waves in radial tires (Kwon and Prevorsek), 44

Standing wave
Formation of standing waves in radial tires (Kwon and Prevorsek), 44

T

Tire-rim interaction
An experimental—analytical method to determine interaction forces on tire rims (Koeller), 23
